A portion of a block of 50,000 2-year-old grapes taken July 1st, that we have to offer this season.

PERFECTION CURRENTS—

We have a fine block of true to name Perfection currants to offer to our trade this year. They are taken from a selected field of Perfection currants which has won high merits for its extremely heavy yield and also a high grade both as a shipper in eastern markets and local wine use.

WASHINGTON RASPBERRY—

The following portion of a letter from the Western Washington Experiment Station at Puyallup, Washington explains for itself the prospects of the Washington raspberry. "The Washington raspberry has exceeded our expectations this year. Both at the Experiment Station and in commercial plantings in the Puyallup Valley this berry has produced a very heavy crop of berries that are slightly larger than Cuthbert, a little firmer, brighter in color, and apparently adapted to any use that the Cuthbert variety is now being put to. The plants are more resistant to winter freezing than Cuthbert; they are fully immune to attack by the Western Yellow Rust disease, which sometimes is serious on Cuthbert, and the mosaic disease spreads more slowly in this variety than in Cuthbert. Considering all of these good points, we think that Washington is a good substitute for the Cuthbert Variety under Western Washington conditions."

NEWBERG RASPBERRY—

The finest market raspberry that we have seen at the present. Its berries are large, heavy yielder, good shipper, and has rugged upright canes. The berry is much like the latham but is much healthier with longer canes. Also does not crumble like latham.

FREDONIA GRAPE—

We think the Fredonia grape is going to be one of the leading grapes in the near future for home gardens because of its sweetness and earliness.

TERMS AND CONDITIONS OF SALE—

Terms—Cash from unknown customers or those who have not established their credit with us. 30 days 2% discount.

FOR CASH WITH ORDER, 10% DISCOUNT

Prices—Prices are F.O.B. Olympia, boxing and packing at cost, and are as low as is consistent with the quality of our stock.

Claims—No claims for errors or discount will be allowed unless made within 10 days after receipt of goods.

Less than 50 plants at 10 rate; 50 plants of a variety at 100 rate; 500 at 1000 rate. This cancels all previous quotations.

Shipping Season—Plants can be shipped from here at any time from November to May or later, excepting at times when weather prevents digging for short periods.

Condition of Sale—We give no warranty, express or implied, as to description, quality, productiveness or any other matter of any plants, nursery stock or roots we sell, and will not be in any way responsible for the crop.

There are many contingencies to be encountered in growing plants such as weather, improper care, and other conditions, over which the seller has no control, so that success is not entirely dependent upon the plants. Therefore no guarantee to grow can be given.

Our plants are grown on our own farm and given the best care and cultivation; our beds are state inspected, thus insuring your protection against disease and root weevils.

It is mutually agreed between the buyer and ourselves that we will not be liable for a greater amount than the original cost of plants or nursery stock, if at any time any should prove to be not true to name.
